Introducing WindWorks Design

ROCHESTER, NY, September 4, 1998 -- WindWorks Design is an engineering firm devoted primarily to the design and application of technology for music. Started in 1998, the company has worked on a number of projects serving the music industry. Most of the work to date has been engineering solutions for private customers, especially applications for wind synthesizer. Early work has included experimental wind synthesizer controllers, re-keyed WX7 wind synthesizer controller for brass style fingerings, and a prototype "brainbox" for a the popular EWI wind synthesizer.
